

READING,

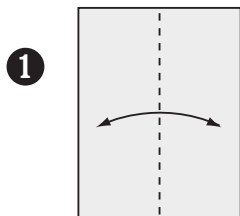

an important key to school success

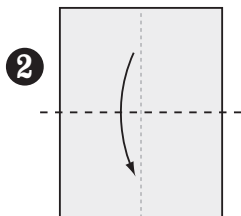

DEAR PARENTS,

Today in class we read the book *Ce livre n'est pas le bon!* Tonight, your children will invite you to help them build a sailboat. Reviewing the instructions to learn how to fold properly is a fun way to read together. Once the work is completed, send it back to school.

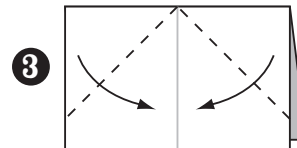

Don't forget to have fun!

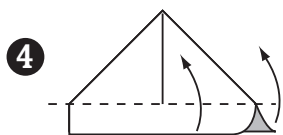

1 Take a rectangular sheet and fold it in half. Then unfold it.

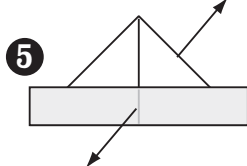

2 Fold the sheet in half in the other direction.

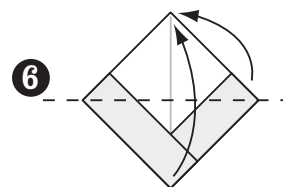

3 Fold down both corners from the top to the centre, along the length of the fold.

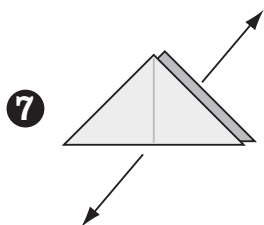

4 At the bottom of the sheet, fold the two triangles upward, one on each side.

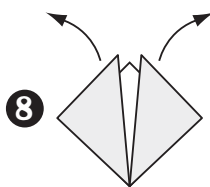

5 Grasp the centre of both triangles and pull them apart to obtain the shape in Figure 6.

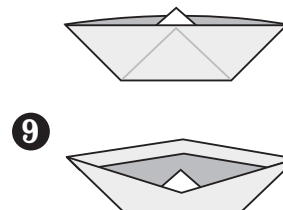

6 Fold the lower triangle towards the top and do the same with the triangle on the other side.

7 Grasp the centre of the bottom of both triangles and pull them apart to obtain the shape in Figure 8.

8 Grasp the two top corners and separate them.

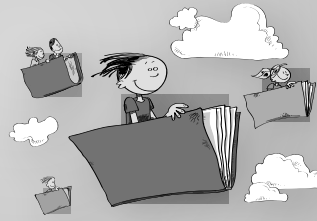

9 Bravo! The boat is ready to set sail. The child can then decorate it and write the title of one of their favourite books on their new boat.

If you search the Internet for "How to fold a paper boat" you will find a video on YouTube to help you.
